TECHNICAL DETAILS

The pressure tanks of the units are manufactured in accordance with the 2014/68 / EU directive.

Manufactured and certified in accordance with TS EN 13445: 2014 standard.

It contains CE mark.

Manufactured with 50 l water tank capacity as standard. 75 - 90 - 100 liters options are available. Due to its compact design, does not require large storage space when it is not used. Large diameter wheels gives the system high maneuverability.

Works with compressed air.

Designed for areas where fixed emergency shower, eye/face wash systems can not be installed and/or for use during temporary work and where there may be various hazards.

The shower can be carried easily by one person, via its wheeled trolley system.

2" filling cap is included.

A regulator on the outlet of the water tank is included to ensure controlled and regular water flow.

In case of emergency, ventilated clean water is sprayed by pushing the valve handle. Manufactured with push handle control and fixed spray head as standard.

After each use, by repeating the water filling and air compressing processes continuous use of the system is ensured.

Standard Components of the System

- 1) 304 Stainless Steel Water Tank
- 2) Trolley (Material is galvanized steel)
- 3) 304 Stainless Steel Emergency Shower and Eye/ Face Wash
- 4) Water Pressure Reduce Valve
- 5) Air control valve
