

3M™ Scott™ Sight In-Mask Thermal Imager

Hands-free thermal intelligence

When you wear a 3M Scott sight thermal imager, you get more than constant thermal vision. You get your hands back. That's because unlike other handheld thermal imagers, Sight uses a small thermal camera mounted to the side of the facepiece. A display mounted inside the facepiece allows the firefighter to see the image without the need for reaching down and handling an imager.

In-Mask Display See a clear image unaffected by external conditions

Adjustable Display Configurable to your line of sight

Auto System Power Off Equipped with an accelerometer to automatically turn off the system when not in use

TECHNICAL DETAILS

Highlights

- In-Mask Display See a clear image unaffected by external conditions
- Adjustable Display Configurable to your line of sight
 - Auto System Power Off Equipped with an accelerometer to automatically turn off the system when not in use
- Single-Button Power-Off Power off both the in-mask display & thermal imaging camera by a single press of the power button on the in-mask display
- Instantaneous On Power the in-mask display on with a one-second push of the in-mask display power button

 - Cold-Spot Tracker Immediately identify the coldest part of the scene and display its relative temperature. Ideal for hazmat environments (Pro Package only)
 - Tactical Video Recording (TVR) Automatically record all the information shown on the in-mask display for review later (Pro Package only)

The 3M™ Scott™ Sight In-Mask Thermal Imager combines a small thermal camera mounted to the side of the facepiece with a miniaturized display inside of the facepiece, enabling hands-free operation.

When you wear the 3M™ Scott™ Sight In-Mask Thermal Imager, you get more than constant thermal vision. You get your hands back. That's because unlike other hand held thermal imagers, Sight allows firefighters to always see the image without the need for reaching down and handling an imager. Firefighters now have both hands free for effective communication, victim extraction and carrying tools. Sight Pro Package is the next evolution of the industry's first in-mask, hands-free thermal imaging solution. Pro Package enables new, advanced features to provide firefighters with

greater situational awareness during fireground operations.
