

EUREKA Impact Vibration Leather - High Performance Vibration Reducing Leather Glove

The **Impact Vibration Leather** is a high comfort vibration reducing glove designed for low to mid-frequency tools. The educational print in the palm provides high grip. It is perfect for working environments where sparks may occur. The main materials are leather and elastic polymer. It is certified according to **EN 388**, **EN 388 CUT**, **ANSI CUT**, and **EN 407** standards. Cut resistance is **A2, B**; vibration resistance is for **Slow rotating tools**. Additional features include **Contact heat resistance**, **Flame resistance**, and suitability for **Oily environments**.

Standards & Protection:

- **EN 388:** 3X23B
- **ANSI CUT:** A2
- **EN 407:** 43XXXX
- **Materials:** Leather, Elastic polymer

Applications:

- Working with low to mid-frequency vibrating tools
- Environments where sparks may occur
