TECHNICAL DETAILS

New design in combination with uncompromising choice of materials and manufacturing technology. High degree of protection and simple usage make this extremely light helmet with integrated flip-down visor universal.

Certificates

- EN 443:2008
- EN 14458:2018
- MED

Performance

- Extreme temperature resistance (up to 1,000°C in a 10 second flash over flames)
- Long-term temperature resistance (radiant heat test 14 kW/m^2)
- High resistance to mechanical impacts
- Low-temperature classification: -40°C

Safety

- Electrical insulation capacity: E3
- Reflective elements for better visibility in low-light conditions
- Neck protector (available in aluminised fibre, meta-aramid or wool for Holland style)
- 4-point chinstrap (flame resistant, tested to prevent skin irritation)
- Chemical resistance (according to EN 443)
- Type A3b

Comfort

- Ultra lightweight configuration
- Easily replaceable and washable inner padding
- Integrated adjustment system (53–67 cm)
- Wide range of accessories

High Tech Materials

- Flame-retardant and high-temperature resistant glass fibre reinforced thermoplastic
- Anti-scratch and anti-fog coated integrated visor (EN 14458)
- Anti-scratch and anti-fog coated internal goggles (EN 166 and EN 14458)

Weight

- 1300 g ± 30 g (basic configuration, without accessories)
- 1355 g ± 30 g (basic configuration, with aluminised neck protector)

Color Scale

- White, Yellow, Red, Blue, High Visibility Yellow, Photoluminescent, Custom Color
